

# Voice & Flight: A Sound Story Project

**A creative literacy journey through sound, story, and symbol**

## **Purpose**

Let sound lead. This project invites learners to explore the phonemes that matter to them most—turning those sounds into meaning-rich creations. Inspired by the Joybird & Tern sample pack, this activity is the heartbeat of project-based learning in *The Alphabet System™*.

**This activity invites learners to:**

- Choose a bird + sound pairing that resonates personally
- Gather words, memories, or imagery connected to that sound
- Create a project: a zine, podcast, oracle card, poem, or performance
- Share the story: Why does this sound matter to me?

## **Project Outcomes:**

A student artifact that blends phonics and identity—rooted in personal meaning and creative voice. Ideal for all ages and adaptable across modalities.

## **Optional prompt:**

“If this sound were a bird flying through my life, what would it carry?”
